

#2 Customizing App

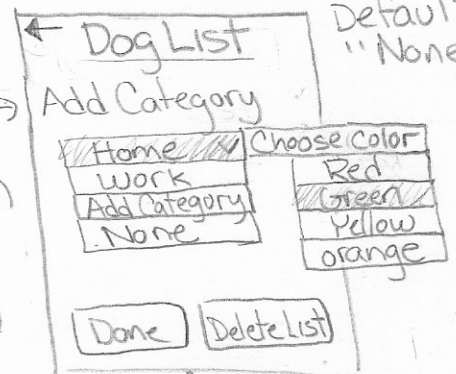

Click on gear icon

click on arrow

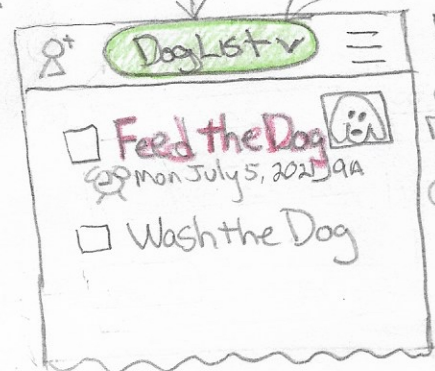

Click on pencil icon to edit

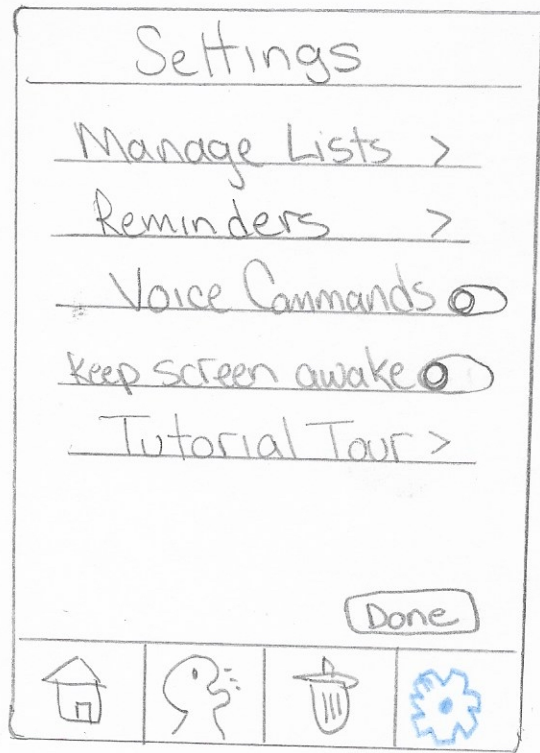

Default is "None"

Lists can be categorized (home, work, etc) with a color representing that category by using color in the list name. The user chooses the color they associate with that list category. This is done using a drop down menu.

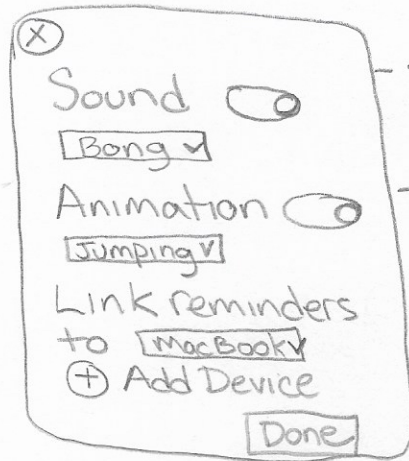

List Name is now green to represent Home Category for List

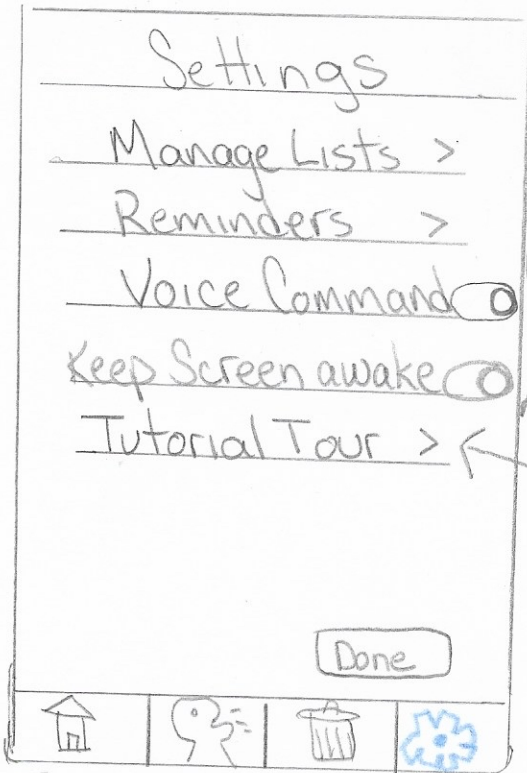

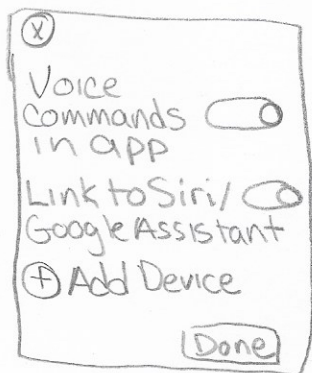

Click on Reminders arrow

switch on/off to activate/deactivate
 - Drop down menu highlighted when activated to choose variety of different options
 - Add a device to link reminders with + icon and choose device with drop down menu.

Switch on Voice Command arrow

- Switch on/off to activate/deactivate
 - Click + icon to add device

User clicks on arrow and will be taken to the Getting started Tutorial Tour when first signed into app

Switch on to keep screen open & prevent screen from going into sleep mode.

when user click on home
